

Week One Practical Tasks

T1. **Variables and Data Types:** Declare variables of different data types (int, double, boolean, String) to store the following information:

- Age of a person
- Height of a building
- Whether it's raining (true/false)
- Name of a city

T2. **Operators and Keywords:**

Write a Java program that takes two numbers as input from the user and calculates their sum, difference, product, and division.

T3. **Java Control Statements:** Write a program to print all even numbers between 1 and 20 using a for loop.

T4. **Java If-else and Switch:**

Write a program that takes the weekday number (1 for Monday, 2 for Tuesday, ..., 7 for Sunday) as input from the user and prints the corresponding weekday name.

Pay attention ⚠️ ***"Remember, even the greatest programmers started with 'Hello World'. You're on the right path!"*** 💪 😊
